My practical training experience

Place where you had your practical training

- I had my practical training at Skeleton Software located in Sady Pětatřicátníků

When exactly, your working hours

- I was working from 31st of October to 11th of November
- I usually started from 8 o'clock to 4 o'clock in the afternoon

Job description

- Skeleton Software is a company working on custom-made software and web applications

Your duties, responsibility

- My duty was working on a comparer application programmed in C#

Good things about the job, what you liked about it

- I really liked the people who I worked with

Bad things about the job, what you did not like

- I really hated my working hours. 8 to 4 is too much for a non-paid practical training

Benefits of your practical training

- My benefits are that I could see how it's going in a company like that

What to change about the practical training

- Probably nothing. I like that we had an opportunity to try this

Your short-term plans for the nearest future

- I would like to finish school successfully

Your long-term plans for the future

- I want to find a well-paid job, a wife, have a dog and a pretty big house

Your future career and what you need for it

- For my future career I want to move to Japan and work there. I would like to work in a programming company / game developing company or something like that
